CIRAD

Overview of the course

- **11 sessions (+ today) grouped into 4 themes:**

- Climate change impacts on cities (3 sessions)
- Greenhouse gases (GHG) emissions in cities (3 sessions)
- Implementing climate policies (3 sessions)
- Cross-cutting issues (2 sessions + today)

- **Asynchronous work**

- The course will take form a video to be watched/documents to be read before each session
- One special session : negotiation game (nothing to prepare)

- **Exam**

- Quizz at the beginning of each session + oral participation (10%)
- Oral group presentation : 45%
- Final written exam : 45%

Work to be done + content of the sessions

■ Between 2 sessions

- Watch the video of the next session and/or read the documents
 - All course material will be available on Moodle one week in advance

■ During the sessions:

1. At the beginning of each session, a short quizz on the course material
2. Then, a presentation by a group of students on a case study or an academic paper
3. Discussion + questions

Oral presentations

- **Oral presentations done by groups of 4 or 5 students**

- Random groups
- Can you all read French ?

- **Presentation**

- 15 min max
- Prepare a short quizz (3 questions) for your fellow students
- Presentation of the case study, what was done, and what you think of it : what was done well? What could have been made different? Etc.
- NB : If I don't find any relevant case study, the presentation will be on a controversy instead

- **What to present:**

- what was done, and what you think of it
- Could it be generalized?
- [case studies] what was done well? What could have been made different? Which controversies arise?
- [for academic papers] Do you agree with what is said? Is it relevant for many cities? To what extent can this influence policy making ?

Election of the student representative

- Who is candidate?
- Let's vote!
